# Armaan Khan Tufail

karmankkhan@gmail.com | (+91) 8433639534/7498149534 | Shelter Nest Taloja, Navi Mumbai 410208
DOB:10/01/2003

## SKILLS

**Programming Languages** : C++, JavaScript, Python(basic),Java(basic)

**Frontend Technologies**: HTML, CSS, React, Git, Tailwind

**Backend Technologies:** Node.js, Express.js, REST API

**Databases:** MongoDB, Firebase, MySQL,

**Data Analytics :** Excel, Tableau , Machine Learning,

**React Concept :** React hook, React Router , Context Api

## EDUCATION

| | |
|---|---|
| **BACHELOR'S DEGREE | Branch (Computer Science and Data Science)**<br>Mumbai University- Saraswati College of Engineering Kharghar | **CGPA: 7.5 | 2024** |
| **12th HSC |Science(PCMB)**<br>HSC- Maharashtra Board -Bk Patil Jr College | **68.46% | 2020** |
| **10th SSC**<br>SSC- Maharashtra State Board -National Urdu High School | **84.80% | 2018** |

## EXPERIENCE

**React— Internship- XZECT** **June 2024 -Present**

Developed and maintained full-stack web applications using MongoDB, Express.js, React, and Node.js. Designed RESTful APIs and optimized MongoDB databases for efficient data management. Enhanced user interfaces with React, ensuring responsive and dynamic experiences

**React JS — Freelancing** **April 2023 – May 2023**

Made a Netflix and Amazon Clone Using React.js and Movies Api and Tailwind

**MERN — Freelancing** **Nov 2023 – Dec 2023**

Made a Full Stack Project Carbon Emission – MongoDB, Express, Node, React

## PROJECTS

**Smart Voting System:** Revolutionize democracy with our Smart Voting System, leveraging MERN stack for secure authentication, verifiable ballots, and real-time result tracking. Make a authentication system based on otp verification on registered Aadhaar card number and then face recognition using CNN : Firebase, React.js, Node.js ,Python).-

**Blog Website** Developed a dynamic blog web app with secure user authentication, real-time post creation and deletion, and efficient search functionality. Built the backend with Node.js, Express.js, and a REST API, ensuring smooth communication and data handling. MongoDB was used for secure data storage ,– JavaScript, React.js, Node.js, Express.js, REST API, MongoDB.

**Attendance Management System using MERN : -** Web app for attendance tracking Including Features: authentication, record keeping, reporting.— MERN stack (MongoDB, Express.js, React.js, Node.js).

**Dashboard Using React-tailwind :** Developed an e-commerce dashboard using the MERN stack, featuring a responsive React.js interface, secure user authentication with Node.js and Express.js, dynamic product management with MongoDB, real-time sales analytics, inventory tracking, order management, customer management, and interactive data visualization for comprehensive business insights

## React Developer (Mern Stack)

I am a dedicated software developer proficient in frontend and backend development. Passionate about continuous learning, he enjoys exploring new technologies and improving his skills. With a keen interest in sports and self-improvement literature, Armaan brings a well-rounded approach to his work and life.

## ACHIEVEMENTS / HOBBIES

- Completed various projects using React.js, demonstrating proficiency in building dynamic and responsive user interfaces.
- Proficient in version control with Git, effectively collaborating on projects and managing code repositories.
- Learning new skills or technologies, proficient in time management, strong problem-solving skills.
